Summary

I am a full stack developer with 1+ years of experience in creating dynamic and responsive web applications using React js, Nest Js, Node Js, Mongo DB and other modern technologies. I have a passion for building user-friendly and interactive interfaces that enhance the user experience and meet the client's requirements.

Experience

Frontend Developer

GwayERP

Jun 2023 - Present (1+ Years)

Some of the skills and tools I use in my daily work are:

- 1) HTML, CSS, and JavaScript
- 2) React js and Redux
- 3) Nest Js and Mongo DB
- 4) Bootstrap and Material UI
- 5) RESTful APIs and Axios
- 6) Git and GitHub

I have successfully completed several projects using React Js and Node Js such as:

- **Customized ERP Software:** Where user can build their own ERP with customized implementations, It is like a no code ERP development platform, Techs: **React, Nest Js and Mongo DB**. (Product)
- **CRM System:** Manages customer relations and marketing with a dynamic **React/Redux** frontend and **RESTful API**. (Product)
- **Project Management System:** Facilitates project planning and control, featuring task and resource management via a **React/Redux** interface. (Product)
- **ERP System for Electrical Industry:** Oversees windmill and solar panel project operations, with a **React/Redux** frontend linked to a REST API. (Client Project)

Education
