- **Backend & Database:** Firebase, REST APIs, Cloud Messaging
- **State Management:** Provider, Riverpod, BLOC
- **Design:** Material Design, UI/UX, Figma, Lottie
- **Version Control:** Git
- **Other:** Python, Javascript

Projects

Food Donation Platform 📄 gitHub — *Flutter, Firebase*

- Developed a Flutter app to connect food donors, needers, and delivery partners in a seamless platform
- Integrated Firebase for real-time data synchronization, user authentication, and cloud storage
- Implemented role-based navigation to ensure appropriate access and functionality for each user type
- Designed a modern, responsive UI/UX with custom animations for smooth user experience
- Utilized Firebase Cloud Messaging for real-time notifications and updates, improving communication across the platform

Community FM App 📄 gitHub — *Flutter, Audio Streaming*

- Developed an audio streaming application with clean and user-friendly interface
- Implemented audio playback with image and title display for a rich user experience
- Added navigation controls for easy browsing between audio tracks
- Integrated a bottom sheet to display detailed information about the currently playing audio
- Designed a dynamic homepage with an audio overlay for quick access to ongoing content
- Focused on delivering a seamless and interactive experience for users to enjoy and navigate audio content effortlessly
