Email: dhamu9884@gmail.com

Contact: 9884575614

Location: Chennai, Tamil Nadu

Objective:

A highly motivated Flutter Developer with strong experience in building scalable, maintainable, and high-performance mobile applications. Adept at integrating third-party services like Firebase, Google Maps, and payment gateways. I seek to contribute to dynamic teams and challenging projects in a forward-thinking organization.

Education:

- ❖ **Master of Computer Application** (2021-2023)
Meenakshi College of Engineering, Chennai.
CGPA- 8.3
- ❖ **Bachelor of Computer Application**(2017-2020)
DRBCCC Hindu College, Chennai
Percentage-70.30%

Technical Skills:

- ❖ **Programming Languages:** Dart
- ❖ **Frameworks:** Flutter
- ❖ **Tools:** Visual Studio Code
- ❖ **State Management:** BLoC, Provider
- ❖ **Backend & Services:** Firebase (Auth, Firestore, Push Notifications), RESTful APIs
- ❖ **Others:** Google Maps, Push Notifications, Third-party SDKs, Payment Gateway Integration

Professional Experience:

Flutter Developer

MannIT Innovations, Chennai

Nov, 2023 – Present

- ❖ Designed, developed, and maintained mobile applications using the Flutter framework.
- ❖ Integrated Firebase services (Authentication, Firestore, Notifications) and RESTful APIs.
- ❖ Implemented Google Maps and push notifications for real-time interaction and updates.
- ❖ Implemented Google Maps and push notifications for real-time interaction and updates.
- ❖ Translated UI/UX designs into functional and responsive applications.
- ❖ Collaborated with cross-functional teams including product managers and designers.
- ❖ Participated in code reviews, testing, and release cycles.
- ❖ Wrote clean, modular, and well-documented code following best practices.

Project 1: Political Campaign App

- ❖ **Description:** Developed a comprehensive mobile application for a political party to manage campaign activities, facilitate group chats, and track members using Flutter Map.
- ❖ **Technologies Used:** Flutter, Dart, REST API, Push Notifications, Flutter Map.
- ❖ **Key Contributions:**
 - Implemented features for campaign management, including event scheduling and volunteer coordination.
 - Developed group chat functionalities to facilitate communication among members.
 - Integrated Flutter Map for real-time tracking of members and event locations.
 - Utilized push notifications to keep users informed about campaign updates and events.

Project 2: Auto Booking App

- ❖ **Description:** Developed a mobile application for booking and tracking autos within a 2km radius, enabling communication between users and auto owners, and collecting feedback.
- ❖ **Technologies Used:** Flutter, Dart, REST API, Push Notifications.
- ❖ **Key Contributions:**
 - Implemented auto booking functionality with real-time availability updates within a 2km radius.
 - Developed tracking features to allow users and auto owners to view each other's location in real time.
 - Integrated calling functionality for direct communication between users and auto owners.
 - Utilized push notifications to inform users about booking status.
 - Enabled feedback collection to improve service quality and user experience.
