PROJECTS

Expert Internal Application [Link](#)

- "Expert Internal Application" is a employee task tracking project designed to track customer product order status and manage token rising. The application has been successfully launched on both the App Store and Play Store. It sends reminders to employees to complete their assigned tasks on time.

Lucky Matrimony App [Link](#)

- Lucky Matrimony is a Wedding App for Finding Life Partner. Developed a mobile application for users seeking life partners, designed to securely collect, process, and display personal information with user consent. Integrated personal chat option for private conversations between matched users. Integrated Push notifications to keep users informed and engaged with real-time updates.

Ayush Clinic App [Link](#)

- Developed a specialized app to streamline patient management, including record-keeping and appointment scheduling. A tool for hospital management system.

Onstru DLR App [Link](#)

- Onstru DLR is a AI-powered Construction Management App. Built to streamline operations on construction sites, the app improves accuracy and efficiency in attendance and resource management while enhancing productivity through automation.

Cat Build App [Link](#)

- Construction Project and Inventory Management Software. Developed an all-in-one construction management application for contractors, project managers, and construction teams to streamline operations. The app centralizes project scheduling, material management, payments, and inventory, providing a holistic approach to construction project oversight.

Rurutek IP Camera Streaming Application (Android)

- Developed an advanced IP camera streaming application featuring secure app access through fingerprint authentication. Integrated ONVIF-supported IP camera streaming, enabling users to customize multiple frames and create personalized camera lists. Implemented a camera discovery feature utilizing Wi-Fi technology, simplifying the process of identifying and connecting to new cameras within the network.
