Mobile: +91 9688174025

Email: gopinathckandasamy25@gmail.com

A seasoned **Flutter developer** with a proven track record of **Four** years, specializing in facilitating businesses in the seamless adoption of cross-platform applications and tools. Proficient in collaborating with teams, conducting thorough business analysis, designing robust solutions, strategic planning, and executing development tasks.

EXPERIENCE

Core Solutions Inc, Senior Software Developer.

April 2022 - March 2024

Macs IT.Com Pvt Ltd, Junior Software Developer.

December 2019 - March 2022

EDUCATION

Kongu Engineering College, B.E.(CSE)

July 2014 - April 2018

PROJECTS

Project: Cx360Go

Client: OPWDD (Android, IOS & Windows)

Project: Cx360Go

Client: IH (Android & IOS)

Description:

Cx360 is an EHR platform designed for behavioural health and intellectual or developmental disability (IDD) providers. It optimizes billing, manages daily workflows, coordinates care, manages medications, and provides access to evidence-based tools. The platform supports telehealth appointments, allows clients to access their records, communicate with their care team, and improves outcomes and financial performance.

Responsibilities:

- Design & implement new app modules based on product requirements using Flutter framework, ensuring adherence to UI/UX design guidelines.
- Develop user interfaces created by UI/UX designers, focusing on aesthetic appeal and usability across various devices.
- Collaborate closely with CFT including UI/UX designers, Product Owners (**POs**), Quality Assurance (**QAs**), and fellow developers to deliver high-quality solutions.
- Utilize Microsoft Azure for **cloud-based solutions** and code commit management, ensuring secure and efficient development process.
- Leverage **Git for version control**, managed **JSON data** & integrated **RESTful APIs** for seamless communication with backend systems developed a mobile application.
- Engage in all phases of the **software development lifecycle**, from planning and design to development, testing, and deployment, ensuring timely and high-quality deliverables.

SKILLS

Languages – Core Java, HTML, JavaScript, Dart

Tools–Android studio, Visual studio, Xcode

Databases -SQL, Firebase.

Operating Systems- Windows , Linux

Defect Tracking Tools - JIRA.

Frameworks -Flutter

Other Tools- GIT, Azure

PROFESSIONAL SUMMARY:

- ❖ Proficient in using the Flutter framework for high performance mobile applications.
- ❖ Skilled in using MS SQL for database management & optimization
- ❖ Expertise in implementing UI and UX designs that enhance user satisfaction & accessibility.
- ❖ Experienced in developing applications for multiple platforms (Windows, iOS & Android)
- ❖ Familiar with techniques for reducing load times, improving memory usage, and enhancing overall efficiency.
- ❖ Experienced in working with JSON and RESTful APIs
- ❖ Microsoft Azure
- ❖ Offline Storage & Threading
- ❖ Troubleshooting and Debugging

Project: E- agent Trichy

Client: Aavin Dairy Products

Description: An application designed to facilitate the ordering, tracking, and price inquiry of milk, along with the payment status. This app aims to simplify the milk ordering process for agents and streamline the payment procedures for the Tamil Nadu Government with auto-update feature to minimize bugs and ensure smooth operation.

Project: Mobile Sales Order (MSO)

Client: Bosma

Description: The MSO application is designed to reduce consumer waiting time at the counter area. Salesmen can gather purchase details from consumers, scan products, and send the order to the billing counter with order number. Consumers can pick up their ordered products without waiting at the counter & have the option to change, add, or delete their orders at the counter.

Project: Atas (Face recognition Attendance)

Client: Bosma

Description: The ATAS application simplifies the attendance procedure of employees using facial recognition technology along with latitude and longitude verification. The application calculates employee working hours by login and logout times, ensuring that logins can only occur at the office location as verified by latitude and longitude coordinates.

Project: mReport

Client: Bosma

Description: This application is utilized in the sales and purchase domain to streamline data analysis and reporting. It efficiently collects data from the database and generates comprehensive reports in both chart and grid formats for specified time periods. This functionality allows users to gain insights and make informed decisions based on visualized data trends and patterns.

Technologies and Tools:

- **Framework:** Flutter
- **Language:** Dart
- **API:** Razorpay_flutter
- **Database:** Firebase, SQL, SQLite
- **Development Tools:** Android Studio, Visual Studio Code
