PROFILE SUMMARY

Experienced in building cross-platform mobile applications with strong expertise in Flutter and Dart. Leveraging independently acquired expertise to handle the complete app lifecycle, including state management, API integration, database solutions, and responsive UI/UX design. Capable of deploying production-ready applications to major app stores while ensuring high performance, scalability, and seamless user experiences.

SKILLS

- **Programming Language:** Dart
- **Framework:** Flutter
- **State Management:** GetX, Provider, BLoC
- **Database Management:** Firebase, SqFlite, Hive
- **API Integration:** REST APIs, HTTP Requests
- **Version Control:** Git, GitHub
- **UI/UX Development:** Material Design, Responsive UI
- **Development Tools:** Visual Studio, Android Studio, Postman, Figma
- **Third-Party Integrations:** Google Maps, Payment Gateways
- **Live App Deployment:** Applications published to global app platforms
- **Additional Skills:** Data Structures & Algorithms, OOPs, Debugging
- **Familiar With:** HTML, CSS, Bootstrap, Java, C

PROJECTS

Zoomio | Cab Booking App

(User App) [App-Link](#) | [GitHub](#)

Zoomio is a feature-rich cab booking application designed for a seamless and hassle-free ride experience. Users can book rides instantly, choose from multiple vehicle options, and make secure payments. The app integrates advanced mapping, authentication, and communication features to enhance user convenience.

- Built with **Dart and Flutter** for the frontend and **Firebase** for backend services.
- Implemented **Google Maps API** for route visualization and location tracking.
- Integrated **Razorpay payment gateway** for secure transactions.
- Utilized **BLoC state management** and **Clean Architecture** for optimized performance.
- Added **chat and call features** for direct driver-passenger communication.
- Enabled **dark and light mode** support for enhanced user experience.

Technologies Used: Dart, Flutter, Firebase, Hive, Google Maps API, Razorpay.

MyTrips is a smart travel companion designed to simplify itinerary planning and memory preservation. Users can create and manage trips, document experiences with photos, and organize their travel details effortlessly.

- Built with **Dart and Flutter** for the frontend and **Hive** for local storage.
- Implemented **trip planning and management** with options to add, edit, and delete trips.
- Designed a **memory section** for users to store trip experiences with images and notes.
- Utilized **ValueNotifier** for efficient UI updates.
- Integrated **user authentication and profile management** for personalized experiences.
- Enabled **trip-specific planning**, allowing users to add activities and schedules.

Technologies Used: Dart, Flutter, Hive.

MINI PROJECTS

Stock Flow – Inventory Management System

[GitHub](#)

Stock Flow is a Flutter-based mobile application for **inventory management**, built using **Firestore Authentication** for secure login and **Provider state management** with **MVVM architecture**. It supports **CRUD operations** for inventory and customers, a **sales module** for transaction recording, and **report generation** for sales, inventory, and customer ledgers. Additionally, it includes **data export** options in **Print, Excel, PDF, and Email** formats.

Technologies Used: Flutter, Dart, Firestore, Provider

TaskEase - To-Do App

[GitHub](#)

TaskEase is a Flutter-based to-do application utilizing **BLoC** state management for structured task handling. It supports **CRUD operations**, integrates **HTTP APIs** for remote data management, and ensures **real-time task updates** with automatic list refresh.

Netflix Clone

[GitHub](#)

A Flutter-based Netflix UI replica integrating **TMDB API** for movie data retrieval. It utilizes **HTTP requests** for data fetching and presents a seamless **user interface design** closely resembling the original app.

EDUCATION

Mobile App Development using Flutter

Prototype, Calicut

2025 – Present

[Certificate](#)

BASOH (Bachelor of Arts, Hons.) in Sociology

Indira Gandhi National Open University

2020 - 2023

Diploma in Electronics Engineering

Board of Technical Education, Kerala

2015 – 2018
