CAREER OBJECTIVE

- **Detail oriented React Front End Developer** with more than five years of experience working with **HTML, CSS, JavaScript, JQuery, and Typescript**. Highly adept at both independent and collaborative projects, with an emphasis on landing page and website development.
- An experienced **Power BI Data Analyst** is responsible for data modeling, enterprise data management, data presentation, visualization, optimization, risk assessment, predictive analysis, advanced data analysis, business research, and quantitative analysis.
- Experience in publishing Power BI Desktop reports **created in Report View Visualization** to the Power BI service.

WORK EXPERIENCE

01.2020 - present | Ziga Infotech Ventures Private Limited, Chennai

Team Lead | React Developer

- Accelerated the user interface development process by 35% through implementation of component-based architecture with **React and Redux**.
- Collaborated with a **team of 5 developers** in order to introduce a new responsive web application, enhancing customer engagement by 20%.
- Reduced load time by 25% by **optimizing components** for maximum performance across a vast web of internet-connected devices.

React UI Developer

- Designed responsive designs using **CSS3** to arrange all elements of a web page to adapt to the screen size of different devices, such as a PC, tablet, and mobile phone.
- Designed a **front-end framework with React.js Using class components and functional components** I am very familiar with the properties of components, states, props, and references.
- Tailwind CSS offered an extensive set of utility classes, allowing me to style the application quickly and beautifully without writing custom CSS.

React Developer

- Develop **front-end features, components, and libraries**, translating designs and wireframes into high-quality, reusable code optimized for maximum performance across various web-capable devices and browsers.
- Demonstrate ability to lead and contribute to technical discussions, participating in and facilitating daily stand-ups, biweekly sprint planning, and sprint retrospectives.
- Conduct code reviews to ensure alignment with architectural principles and coding standards across the project lifecycle.
- Analyze requirements and create detailed specifications for program development, partnering with architects and the development team to design, code, test, debug, document, and maintain software and applications.

Data Analyst/Power BI Developer

- Utilized Power BI to **create various analytical dashboards** that helped business users get quick insight into the data.
- Performed queries, maintained and extracted data from Teradata, and cleaned and maintained the production environment in Teradata for performance.
- Used Data Analysis Expressions (DAX) to create measures and calculated fields to analyze data and create time intelligence.

Front-End Developer

- I worked on theme customization, migrations, custom scripts, and developing responsive web pages.
- I created a **custom section and template** called the dynamic meta field based on the product variant type.
- Integrated into the customer dashboard, the table format is shown in the order list. If needed, we can download the order receipt from the dashboard using JavaScript.

UI Designing and Front-End Architecture

- Determining the **design and layout** of 250+ web applications using HTML, CSS, and JavaScript with 100% accuracy.
- Developing 10+ web applications by using responsive UI elements via React concepts for smooth performance.
- Building user interface code for 7+ web applications with Reacts and JavaScript based on the approved designs.

WORK EXPERIENCE

HTML5, CSS3, Bootstrap, JS, jQuery, Ajax, WordPress, and PHP using MySQL | Woo Commerce

- Developed blog and online shopping products related to configured SEO, SSL, and speed optimization.
- Theme Customization. Used Elementor, Page Builder, and custom templates.
- Developed and implemented a highly efficient **custom Horoscope Generator plugin**, enabling seamless user verification, data selection, and database storage, resulting in a streamlined user experience and enhanced data accuracy.
- At the same time, I displayed the unselected Rasi and Navasam data values. Finally, I generated the horoscope template with user information. We can download PDFs, images, or anything else we can.

HTML5, CSS3, Bootstrap, JS, jQuery, Ajax, and PHP using MySQL, Core PHP, and Laravel

- Developed Calculator Form, SMTP Mail, Mandrill, and website integration. Implement code based on the project specifications.
- Create new tables within MySQL. Test and document code. Provide feedback to the development group to improve agile project management methods. Page speed optimization

07.2018 - 01.2020 | Securenext Software Pvt. Ltd, Chennai

Frontend Developer

- Developed responsive and blog websites according to the mock-ups provided by the client.
- Experienced in making the web pages compatible with Android, iPhone, iPad, and desktop.
