Java Full Stack Development
Qspider,Chrompet

July 2024
Chennai,India

Projects

Student Management System (Backend Project)

Technologies Used: OOP,Java, JDBC, MySQL

Description: Developed a backend-only application to manage student records, including CRUD(Create,Read, Update, Delete) operations.

Key Features:

- Student Registration: Add, update, and delete student details.
- Attendance Management: Store and retrieve student attendance data.
- Grade Management: Calculate and store student marks and grades.
- Database Integration: Used MySQL for efficient data storage and retrieval.
- JDBC Connectivity: Established secure connections between Java and MySQL.

Library Management System (Full Stack Project)

Technologies Used: HTML, CSS, JavaScript, Java, JDBC, JPA, MySQL

Description: Designed and developed a full-stack Library Management System for managing books and users.

Key Features:

- Book & User Management: CRUD operations for books and users.
- Book Borrowing System: Checked book availability, borrow limits, and due dates before issuing books.
- Book Status Handling: Auto-updates book status (Available, Borrowed, Overdue).
- User-Book Connectivity: Established relationships between users and books with proper validations.
- Database Integration: Used JDBC for database connectivity and JSP for the frontend.
- Frontend UI: Developed using HTML, CSS, and JavaScript for an interactive user experience.

Skills

- Programming Languages: Java,SQL
- Web Technologies: HTML,CSS,JSP
- Backend Technologies: JDBC,Servlets,J2EE,Hibernate
- Databases: MySQL
