## Education

---

|                                                              |      |
|--------------------------------------------------------------|------|
| B.E in CSE, Dr. G.U. Pope College of Engineering – CGPA: 7.5 | 2024 |
| HSS, TVANN Higher Secondary School – Percentage: 79%         | 2019 |
| SSLC, TVANN Higher Secondary School – Percentage: 96%        | 2017 |

## Experience

---

**Flutter Developer**, SBSR Kannam Pvt Ltd – Chennai Aug 2024 – Present

- Designed and implemented **responsive UI** for seamless user experience across platforms, contributing to a finance-related cross-platform app for managing financial data.
- Applied **Bloc** and **GetX** for efficient state management, ensuring scalability and performance optimization, while integrating **REST APIs** for real-time data synchronization.
- Collaborated with cross-functional teams to enhance application features, performance, and user satisfaction.
- Continuously improved app functionality, ensuring a robust and user-friendly experience.

**Flutter Developer Intern**, Digisailor – Thoothukudi July 2023 - June 2024

- Proficient in designing **intuitive UI** with Flutter, utilizing core concepts like **Widgets**, **Layouts**, and **Navigation** for responsive applications.
- Hands-on experience in implementing **GetX** for **state management**, ensuring scalable and maintainable app architecture.
- Successfully contributed to real-time projects by integrating APIs and **Firebase** for authentication, cloud storage, and real-time data sync.

## Projects

---

### Cooperative Society Financial Bank Mobile Application

- Developed a mobile banking application for a cooperative society, allowing users to manage accounts, make payments, and track transactions.
- Utilized Flutter and Dart for a responsive UI, GetX for state management, and SQL for data storage, ensuring smooth app performance.

### Vehicle Authentication Admin App

- Developed a Vehicle Authentication Admin application for mobile and tablet platforms using Flutter, Dart, GetX, and Firebase.
- Implemented REST APIs for secure data exchange and used GetX for efficient state management.

## Technologies

---

**Programming Languages:** Java, Dart, HTML, SQL

**Libraries/Frameworks:** Flutter, Bloc, GetX, Clean Architecture, REST API, Payment Gateway, Google Map

**Tools/Platforms:** GitHub, VS Code, Android Studio, Figma

**Databases:** Firebase, SQL

## Certificates

---

**Store Listing Certificate** – Google Play Academy [[Link](#)]

**MERN Stack Development** – DevTown [[Link](#)]

**JAVA Course** – DevTown [[Link](#)]
