Objective

Full Stack Web Developer with 2+ years of experience specializing in the MERN stack. Adept at building scalable web applications using MongoDB, Express.js, React, and Node.js. Proven ability to deliver high-quality solutions and collaborate effectively with cross-functional teams. Seeking opportunities to leverage my skills in innovative projects and contribute to dynamic development environments.

Professional Experience

Santhila Databot Pvt Ltd

Software Engineer

November 2023 - Present

Game Application(LMS)

- **Frontend Development:** Engineered interactive user interfaces for the Aurelius game web application using React (TypeScript), ensuring a seamless user experience across devices.
- **Backend Development:** Developed server-side logic and API endpoints with Express.js to support dynamic application features.
- **Database Management:** Designed and optimized MySQL database schema for efficient data storage and retrieval.
- **3D Integration:** Utilized Three.js for creating and managing 3D animations and interactive game elements.
- **Collaboration:** Coordinated with design and product teams to deliver engaging game experiences, conducted code reviews, and participated in sprint planning meetings.

AI Translator Tool

- **Frontend Development:** Designed and implemented interactive user interfaces for the AI Translator Tool using React.js, delivering a responsive and user-friendly experience across devices.
- **Backend Development:** Developed backend services using Next.js to manage API integrations and support the application's functionality.
- **API Integration:** Integrated the ChatGPT API to enable seamless and accurate language translation while maintaining the original content's structure and formatting.
- **File Upload and Processing:** Implemented functionality allowing users to upload Word files for translation, preserving the original layout and content during the process.
- **Collaboration:** Worked closely with the product and design teams to ensure the tool met user requirements, optimized workflows, and delivered high-quality outputs.
- **Testing and Deployment:** Conducted end-to-end testing and deployed the application to ensure smooth performance and scalability.

ERP Tool

- **Frontend Development:** Built an intuitive and responsive user interface for the ERP tool using React.js, enhancing user efficiency in generating invoices and managing bills.
- **Invoice Generation:** Designed and implemented dynamic invoice generation features, ensuring accurate calculations and a seamless workflow for users.
- **Bill Management:** Developed functionality to manage bills and invoices based on the last active tab, streamlining user workflows and reducing manual errors.
- **State Management:** Leveraged React state and context APIs to manage dynamic data flow across the application, ensuring optimal performance.
- **Integration:** Enabled smooth integration with browser APIs to track and retrieve the last active tab for context-based processing.

AI Photo shop Tool

- **AI Web Application:** Developed an AI picture generation web application using Next.js, featuring image uploads, canvas-based fine-tuning, and filter integration with Pixels.js.
- **UI/UX Design:** Implemented pagination, search, and filter options for image models, ensuring responsive design for mobile views.

Cubematch Claritaz

Junior Software Developer

September 2022 - May 2023

HireProgrammers

- **Web Application Development:** Built and maintained features for a web application using Next.js, including profile updates, PDF resume uploads, and project status management.
- **Backend Integration:** Managed file uploads and form validations, configured SMTP for email communications, and maintained backend connectivity with Nest.js and MongoDB.
- **Client-Side Routing:** Implemented efficient client-side routing and form validations for enhanced user experience.

Skills

Frontend: React.js, Next.js, JavaScript (ES6+), HTML5, CSS3, Bootstrap, Tailwind CSS

Backend: Express.js, Nest.js, Node.js

Database: MongoDB, MySQL

Version Control: Git (repository creation, branching strategies, merging, conflict resolution)

3D Graphics: Three.js

Education

G.T.N Arts College, Madurai Kamaraj University

Bachelor of Computer Applications

2017 - 2020
