Ambattur, Chennai

Career Objective

A passionate and adaptive developer, looking to contribute my skills in VR/XR and game development to a forward-thinking organization, while continuously learning and growing in the gaming industry.

Technical Skills

Unreal Engine 5

Unity

C++

C#

Git

Education

Bachelor of Science in Mathematics

St. Joseph's College (Autonomous), Tiruchirappalli

2018 - 2021

Master of Computer Applications

University of Madras, Guindy, Chennai

2022 - 2024

Experience

AR VR Industries

Game Developer | VR/MR Simulator

April 2024 - April 2025

Company Projects

- **INS-VIKRANT:** Co-Developed and implemented local multiplayer functionality in a Mixed-Reality fire-fighting simulation in Unreal Engine 5, deployed at the Indian Naval base in Kochi.
- **M3 CARL GUSTAF:** Developed and upgraded a VR/MR simulation of a rocket launcher in Unreal Engine 5, replicating the real weapon's mechanism.
- **Igla-S:** Developed a VR/MR simulation of the Igla-S Anti-Aircraft missile system in Unreal Engine 5, with gameplay mechanics that mimic the real weapon.
- **Drone SIM:** Developed a physics-based VR/MR simulation of a drone in Unreal Engine 5, featuring all fundamental flight functionalities, including 360° panoramic camera control, and a remote controller displaying real-time flight information.
- **Chopper Scouting:** Developed a VR chopper scouting mission in Unreal Engine 5, where the player must identify and confirm whether vessels are enemy or friendly and report back.

College Projects

- **BREAK-FREE:** A 3D puzzle platform game that immerses players in a prison escape scenario, developed in Unity as the main project over four months in college.

Certifications

- Learn C++ for Game Development [Udemy](#)
- Unreal Engine 5 C++ The Ultimate Game Developer Course [Udemy](#)
