

FARSANA RAHMAN

Flutter Developer

[+91 7012709504](tel:+917012709504) farsanarahmanc@gmail.com [LinkedIn](#) [GitHub](#) [Leetcode](#)

OBJECTIVE

Enthusiastic and committed self-taught Flutter developer with a solid grounding in Flutter and Dart. Skilled in Firebase integration, RESTful APIs, Sqflite, and Hive, with a talent for developing visually engaging and intuitive mobile applications. Excited to work on groundbreaking projects and add value to dynamic development teams in the constantly evolving field of mobile app development.

TECHNICAL SKILLS

Programming Language	Dart
Interests	Flutter
State Management	Provider, GetX, Bloc
Databases	Firebase, sqflite, Hive
Development Tools	Postman, Git, GitHub, Visual Studio, Android Studio, Figma
Familiar with	HTML, CSS, Bootstrap, C++, C
Proficient with	OOP, Debugging, REST API, HTTPS, Data Structures and Algorithms

MAIN PROJECTS

Home Service Booking App

[GitHub](#) [Live Link](#)

A home service booking app with separate user and admin panels built using Flutter. It features Stripe payment integration, Firebase storage, and follows Clean Architecture and MVC for scalable structure.

- Used **Provider** for State Management for Admin Side and user side **Bloc**
- Structured folder using **Clean Architecture** in user side and Admin **MVC**
- Payment integration using **Stripe** payment gateway
- Utilized Firestore for storage with the help of **Cloudinary**

Music App

[GitHub](#) [Live Link](#)

A feature-rich music streaming app built with Flutter, allowing users to manage playlists, identify songs using ACR Cloud, and enjoy a smooth listening experience with Hive-powered local storage and a handy mini-player.

- Easily access and manage your favorite, recently played, and most frequently played songs.
- Create, edit, and organize playlists tailored to your music preferences.
- Implemented a compact **mini-player** for quick access to playback controls while navigating.
- Integrated search feature to find songs, albums, or artists quickly.
- Used **ACR Cloud** to identify songs playing in the environment.
- Used **Hive** for efficient local data storage and smooth performance.

MINI PROJECTS

Weather App

[GitHub](#)

Integrated Open Weather Map API for real-time weather data.

- Used Bloc for State Management.
- Developed a user-friendly interface displaying weather conditions and forecasts.

Favorite App

[GitHub](#)

Enabled users to create, modify, and remove diary entries.Used Provider for State Management.

Student Management Web App

[GitHub](#)

Used Firebase hosting and Firestore for storage.Incorporated an image picker for capturing student photos.

Student Management App

[GitHub](#)

Developed CRUD operations with Sqflite integration.Used Provider and GetX for state management. Incorporated image picker to manage student photos.

Hotstar Clone

[GitHub](#)

Integrated the TMDB API for movie and series info.Used HTTP package and REST API for data handling.
