

SUJI SURESH

About Me

Aspiring Software Tester with hands-on practice in both Manual and Automation Testing. Skilled in Java, Selenium WebDriver, TestNG, and Cucumber with an understanding of Agile and STLC. Committed to writing reliable test cases and identifying bugs to ensure software quality. Quick learner with strong attention to detail and a passion for continuous improvement.

Technical Skills

- **Programming Language:** Java(core)
- Automation Tools:** Selenium WebDriver, TestNG, Cucumber
- Frameworks:** BDD Behavior Driven Development), Page Object Model
- Testing types:**(Functional, Regression, Smoke ,Sanity, Exploratory)
- Version Control:** Git, GitHub
- Defect Tracking:** JIRA, Bugzilla
- IDE:** Eclipse, IntelliJ IDEA
- Build Tools :** Maven
- Agile Methodologies (Scrum)
- Test Documentation , Reporting

Areas of Interest

- Automation Testing using Selenium and BDD
- Writing and executing test cases for web applications Exploring advanced features in Java for test automation
- Agile Software Development and teamwork collaboration
- Learning new testing tools and frameworks

□ Project Experience Automation testing of E-commerce website

- Developed automated test cases for key user journeys such as Login, Product Search, Add to Cart, and Checkout to validate core e-commerce functionality.
- Applied the Page Object Model (POM) design pattern to structure code in a modular, scalable, and maintainable manner.
- Implemented Behavior Driven Development (BDD) using Cucumber and Gherkin to write clear, human-readable test scenarios.
- Managed and executed test suites using TestNG, utilizing features like test grouping, dependencies, and prioritization.
- Configured and used Maven for project build automation and dependency management.
- Generated HTML test reports post-execution to track test status, failures, and debugging information.
- Performed manual testing for scenarios not covered in automation, including negative test cases, error validations, and basic security checks.
- Logged and tracked bugs using JIRA, ensuring effective communication and collaboration with mock team members for defect resolution.
- Participated in mock Agile ceremonies, including daily stand-ups and sprint planning, to align testing tasks with project timelines and goals.
