About Me:

Passionate and dedicated Full Stack Web Developer with 1 Year of real-time experience in building robust and user-friendly web applications. Proficient in both frontend and backend technologies, with a strong foundation in React, Next.js, JavaScript, Python, and Flask.

Tech Stack:

- ❖ React.js, Next.js, JavaScript, TailwindCSS
- ❖ Python, Flask, MongoDB, RestfulAPI
- ❖ Open AI, Langchain, VS Code, GitHub, Webpack 5, Module Federation(Micro Frontends), Postman, Render, Notion, Scrum, Agile, Swagger, Miro, Linux, Aws and DevOps.

Work Experience:

Connecting People's

Full Stack Developer

UNIVERSE-DiaryBlog

Sept2023-Present

- ❖ **Description:** Collaborated with a talented team to develop the UNIVERSE project, a comprehensive web platform comprising various services. One key component was the creation of a bespoke blog application from scratch, employing cutting-edge technologies and best practices.

❖ FrontendandBackend:

- Developed the Universe admin part using ReactJS and Tailwind CSS for seamless management of platform resources.
- Designed and implemented a public site for DiaryBlog using Next.js and Tailwind CSS, ensuring a smooth and responsive user experience.
- Leveraged Webpack module federation for efficient modularization and code splitting.
- Employed JWT token authentication for robust registration and login functionalities.
- Implemented CRUD operations with Python Flask API for seamless data manipulation.
- Utilized MongoDB as the backend database, ensuring scalability and performance.

❖ Features:

- Engineered a modular architecture with three microfrontends and a host app, using module federation for enhanced scalability and maintenance.
- Developed custom components for comments and likes, enhancing engagement and user interaction.

- Implemented error validations, page routing, and responsive design for optimal user experience across devices.
- Integrated social media sharing, follower, subscription, and user statistics features to enhance platform functionality.
- Ensured SEO optimization and metadata management for improved search engine visibility.
- Utilized React hooks extensively, including useState, useEffect, useContext, useRef, and useParams for efficient state management and component lifecycle handling.
- Implemented URL parameter querying and conditional rendering techniques in React for dynamic content presentation.
- Leveraged environment variables, Pymongo, Markdown editor, and Markdown to JSX library for streamlined development.

❖ Process:

- Managed project development using GitHub, adhering to Agile methodologies and Scrum-based practices.
- Conducted thorough testing of APIs using tools like Postman and cURL, ensuring robustness and reliability.
- Collaborated closely with a cross-functional team, fostering a team-based approach to problem-solving and innovation.
- Currently in the beta testing phase, refining features and addressing user feedback for a polished final release.

Education:

A.R.J College of Engineering & Technology
B.E -6.43

Mannargudi, India
Sept.2014 -April.2018

Course and Certification:

Cloud Course

- Linux, Aws, DevOps

Projects

- ❖ Deploying a highly dynamic website using VPC, ELB and ASG
 - Deploying a highly available and secure website using a Virtual Private Cloud(VPC), Amazon Load Balancer(ALB), Auto Scaling Group(ASG) and Rout
